

JURASSIC Detectives

Ichthyosaur Jigsaw

Ichthyosaurs were Jurassic marine reptiles that looked like a cross between a dolphin and a crocodile, with a long and thin snout, perfect for catching fish.

Question 1: Where do these fossil bones fit on the Ichthyosaur skeleton ...
... and what are they?

Famous fossil hunter Mary Anning discovered her first Ichthyosaur in 1811.

Question 2:

Where did Mary Anning discover her first Ichthyosaur?
How old was she?

Question 3:
Most animals don't have a bone in their eye socket.

Why might an Ichthyosaur?

Answers to all of Tom & Mina's puzzles are on the CHCC website.
